THE MANAGING DIRECTOR,
NGONG HILLS
WIND GENERATING STATION.

Dear sir/madam,

I am writing this letter to request a visit to your wind power station by our students at Milele Institute. Milele Institute is a renowned institution that is dedicated to eradicating poverty through education, and our vision is to create a self-reliant community by empowering the youth. We believe that your wind power station presents a great opportunity for our students to learn about renewable energy and its impact on our environment.

We would like to request a tour of the wind power station for a group of 35 students on 12th May 2023. The students will be accompanied by two teachers and will be available to visit from 10:00 am.

We understand that your wind power station is a highly regulated facility, and we assure you that our students will adhere to all the safety measures and protocols that you have in place. We also understand that there may be some restrictions on the areas that we can visit, and we will comply with any guidelines that you provide.

We believe that a visit to your wind power station will provide an excellent opportunity for our students to learn about renewable energy and how it can contribute to sustainable development. It will also inspire our students to consider pursuing careers in the renewable energy sector, and we believe that this will benefit not only our students but also our community as a whole.

Thank you for considering our request, and we look forward to hearing from you soon.

Sincerely,

Michael kitiyo
